C. SUMMARY OF PRESENT LEVELS OF ACADEMIC ACHIEVEMENT AND FUNCTIONAL PERFORMANCE

Strengths of Student (Academic, Functional, Behavior, Learning characteristics, etc.)

Oliver has built relationships with the staff that work with him, and has a way of making staff want to work with him and caring about him. Good at letting staff know when he is done with an activity (signs finished/done), or when he wants something (sign bike). Using one word familiar, daily functional signs, but not all ASL, some made up signs by him. Oliver has an excellent memory, and can catch on to new concepts quickly. He must see a task through to completion, which is a great strength.

Concerns of the parent(s) for enhancing the education of the student

Sarah would like Oliver to go to school longer and do more things rather than him feel like school is his babysitter. Along with stopping the hitting. Wants to observe during school and who should she talk to to do that.

Present level of academic performance, including the student's most recent performance on state or district-wide assessments

Results of state and district group assessment measures:

Test Alternate Assessment (ST)		Test Level 04	Test Date 03/19/2018
Subject	Score	Performance Indicator	
English Language Arts	178	Does Not Meet/Level 1	
Mathematics	158	Does Not Meet/Level 1	
Science			
English Language Proficiency			

Additional Present Levels

Oliver is currently a 9th grader at MVHS. Per doctor, Oliver has only been attending on a partial day for the 22/23 school year. He currently attends Mon. - Fri. from 9 to 11:30. ADD ABOUT ROOM SET UP, STAFFING

Oliver's day/programming have been significantly altered to accommodate trying to keep him regulated and calm at school to decrease his self-injurious behaviors. A schedule was implemented as part of his safety plan for him to do calming, sensory activities with no instructional or academic demands being placed on him.

Oliver currently does not have any academic goals as per agreed up by the IEP team in previous meetings. The focus of his SDI has been primarily Behavior and his safety while at school. When Oliver is regulated and in a safe space, the team will present and engage in some academic activities with Oliver such as; Edmark Signs Around You and pairing with the ASL sign, Sign Language Bingo, Number recognition and counting 0 to 10, in addition basic basket tasks and file folders.

BEHAVIOR: Currently Oliver requires two staff to be with him at all times. When at school he wears a protective helmet with a clear face guard. If he arrives to school with the face guard it stays on the duration he is at school. If he does not arrive with the face guard, staff will put it on at the first indicator he maybe start hitting himself. Oliver works primarily in his own space with a padded table, with staff seated on each side of him. Staff have pillows within arms reach to place in front of Oliver's head if he goes to bang his head against the furniture or floor. When staff walk with Oliver, one staff has their arm over his shoulders and around his neck, or looped under his elbow. Oliver will grab staff hands and guide them to how he wants them to hold on to him. When walking through doorways staff are cautious of the doorframe as that can be a target for Oliver to hit his head on, as well as walls. When staff are seated next to Oliver they sit on roll stools so that they can easily move in or away from Oliver depending on the situation. He at times will attempt to bend down and hit his head on staff knees. He will also lean into staff and hit them on their shoulders with his head. He has also stomped on staff feet, and will hit staff with a closed fist. Often there are days when Oliver arrives to school, and is handed off to staff from parent already in a dysregulated state. When that happens staff often provide alternative activities and honor any communication he exhibits. There are some days he is not able engage in any activities/tasks, but instead will lay on the bean bag with a weighted blanket, or previously go into the lycra swing with a pillow or blanket. Oliver has a safety plan that addresses when behaviors are at a certain degree parent are to be contacted and he is to be sent home due to safety risk. There are times when the staff observe Oliver staring off into space, and find it hard to engage him. We have had the nurse assess him during these instances, and nothing can be derived from that. The concern about potential seizures has been shared with family and physicians. When Oliver hits his head at school, if it leaves a mark, staff contact the nurse to come and assess Oliver. Oliver often comes to school with bruises on his face, cheek area, nose, KNEES, LEGS, ARMS, black eyes, forehead, all for head hitting incidents that occur at home. The staff has collected a variety of different data points, and this proves to continue to support that Oliver's behavior is inconsistent, there is no antecedent, and no specific strategy to prevent or decrease his self-injurious behaviors. He can be elevated one minute, and calm a few minutes later, or visa versa. It is very challenging for staff as they are continually trying new and different things in hopes of finding something that works. When staff start to see indicators of dysregulation (holds his hand out away from his face, will start looking around for something to hit his head on, will attempt to hit his face with his fist) FINISH HERE

Team has gotten better at reading Oliver and trying to get ahead of the hits.

Name Carner, Oliver	Date of Birth 02/20/2008	Student Number 289173	Document Date 06/06/2023
-------------------------------	------------------------------------	---------------------------------	------------------------------------

Staff have noticed a pattern if Oliver comes in for the day hitting his head/face with his fist, that will be what he typically does the remainder of the day. But, if he comes in attempting to hit his head on objects, that will typically be his behavior for the remainder of that day.

Oliver's behavior data to date is the following:

Minor hand hits: 16.7%

Time of Day we see highest activity: 10:15 to 10:30

Major hand hits: 39.6%

Time of Day we see highest activity: 10:15 to 10:30 and 10:45 to 11:00

Head hits: 35%

Time of Day we see highest activity: 9:45 to 10

Hit staff: 20%

Time of Day we see highest activity: 9:00 to 9:15

Redirects: 59.5%

Time of day we see highest activity: 10:45 to 11

To date, he has been sent home: 21 times

Time most frequent: 10:00 to 10:15

The staff has needed to use restraint for risk of serious or substantial injury 19 ADD

Upon arrival if regulated the staff will walk with Oliver to the cafeteria where he will chose an orange and eat in the cafeteria.

Will ride the bike, and occasionally pedal himself and steer. He is riding both inside the building and outside depending on the weather. If he becomes dysregulated while riding the bike, he will try to hit his head on the handlebars, or back of the seat.

Staff observe on an average day that Oliver will request to home starting around 10:00, but some days can be as early as 9:15, or 11:00. He will ask repeatedly by signing, and also ask for the timer. Staff typically set the timer when there is 15 minutes left in his day, to help him know when it is time to go home. If the timer is set too early and moves too slowly he can become frustrated and shows signs of dysregulation by trying to hit his head.

SPEECH/LANGUAGE: June 2023

Oliver is a 9th grade student at MVHS. Currently, Oliver communicates using multi-modalities including: gestures and sign language. In the past, Oliver has used a voice output device with Proloquo2go to make requests and comments. He is not currently using the iPad to communicate and the device is typically used as a timer to let Oliver know when it is time to go home. Oliver will make requests and respond to questions using 1 sign or gesture. He benefits from using a choice wheel as well as the sign to indicate his wants/needs. Many of his signs are ASL, but Oliver also has some of his own signs that he uses such as "timer" and "home/drive." Oliver has strong receptive language skills and is able to follow routines.

EATING: Staff get breakfast for Oliver every day, and he will randomly eat it. He really likes fruit, specifically oranges. When Oliver is eating he generally sits at his padded table, with two staff sitting on both sides of him. He needs to be closely monitored at this time for safety, as he has tried to fall to the ground to bang his head as well as hit his head on staff shoulders.

TOILETING: Oliver will request by sign when he needs to go to the bathroom. Oliver currently requires two people to walk him to the bathroom for safety. Once at the bathroom one staff goes inside with Oliver while the other stands at the door ready to support and assist for safety if needed. Staff have padded the ADA handrail next to the toilet, to protect against head hitting. While Oliver is seated on the toilet, staff stand directly in front of him with hands on his shoulders as he has shown to fall forward off of the toilet to hit his head on the floor. When he is finished he will flush the toilet (and will flush paper towels if staff are not careful). When washing his hands both staff stand beside him, one blocking the wall next to the sink, and the other blocking the toilet area to prevent him from using those items to bang his head. He needs adult prompting to thoroughly wash his hands.

HEARING: Supports the school team and comes in one time per week and provides resources for the team, always checking in, has a great support system. If there is a need by the team, is there for them. Uses a combination of home and school signs. Prefers to sign in his lap and often under the blanket. Staff are encouraging for signs up, but will take them wherever he does them.

Testing:

Oliver's IEP team decided that he will participate in the State Alternate Assessment. He will not participate in district reading or district math assessments as agreed upon by the team.

Present level of developmental and functional performance (including results of initial or most recent evaluations)

Functional/Behavioral:

Oliver has the ability to demonstrate very strong functional skills, however his anxiety, attention, and obsessive-compulsive behaviors impact his functioning quite significantly. The amount of adult support and prompting that Oliver needs varies from day to day. Oliver has difficulty with sleep and sleepless nights often leave him unable to focus. Oliver needs adult prompting to initiate, sustain, and complete tasks. Even when highly motivated by preferred reinforcers, his attention often drifts or falls into an obsessive behavior such as licking his hand. Some of his OCD behaviors include the need to frequently wash his hands, straighten up the room, lick his hand, scratch his skin, and touch other people's necks. When Oliver falls into these patterns of behavior, it often disrupts his academic lesson. Oliver also struggles with his ability to attend. Even when he is calm, he will zone out and can be hard to refocus. This can also happen even when he is working for something preferred such as skittles. For example, when participating in a simple math matching game Oliver did not initiate, sustain, or complete the task independently. Oliver often signs "calm down" when he is feeling stressed and will sign it multiple times. In order to help address the anxiety,

Name Carner, Oliver	Date of Birth 02/20/2008	Student Number 289173	Document Date 06/06/2023
-------------------------------	------------------------------------	---------------------------------	------------------------------------

Oliver participates in sensory breaks throughout his day. These breaks seem to help regulate him some. He enjoys brushing, using the z-vibe, squeezes, pressure, and the head scratcher.

Oliver uses a visual ipad schedule throughout his school day. He needs adult prompting to check it, but can independently find the activity and move it to all done and touch the next activity. He does not yet orient himself to go to the next activity. Oliver engages in a variety of functional routines through out his day. He is able to independently use the bathroom, wash hands, and brush his teeth. Staff help out with these routines to refocus him, not because he doesn't know the routine. At his past school Oliver participated in a variety of functional jobs through out his day such as towel delivery, plant delivery, and lunch box delivery and was reported to have done great job with these routines. Currently Oliver is working on learn similar routines in his new school environment. He does a great job in the lunch line and finds his spot in the cafeteria. He needs occasional reminders to use his eating utensils, but typically does a good job with that. Oliver has adult support at all times during the day for safety.

Occupational Therapy:

Oliver is a 6th grade student who receives special education services under the eligibility of Autism Spectrum Disorder and Hearing Impairment. He tends to need frequent prompts to initiate and stay on task. Oliver primarily uses American Sign Language to communicate. Oliver has been receiving occupational therapy services to help support sensory needs/self-regulation and handwriting. In regards to sensory/self-regulation he has made good gains with tolerating a variety of clothing material and trying a variety of new foods. He now spends lunch in the cafeteria with peers. He has access to a z-vibe, therapy brush and head scratcher. In addition, he likes squeezes. Oliver is able to write his first name from memory. Oliver uses the app Writing Wizard as an additional tool to practice letter formation

Oliver currently qualifies for special education services under the heading of Autism Spectrum Disorder (ASD) and Hearing Impairment (HI). Observations and information collected from his teachers and parents indicate that Oliver continues to show behaviors typical of children diagnosed with Autism Spectrum Disorder that impact his ability to access his education.

Describe how student's disability affects involvement and progress in the general education curriculum

Oliver continues to be eligible for special education support services in the areas of Autism and Deaf/Hard of Hearing. The significance of Oliver's safety needs at school due to his attempts at self-injurious behaviors, supercede all other learning areas including academics. Due to the significant concern for Oliver's safety at school, and the high level of adult support put in place to attempt to keep him self, directly impact his ability to participate in or access any of the general education setting.

D. GRADUATION OPTIONS

Is the student projected to graduate/exit this school year?

☐ Yes ☒ No

Projected Graduation/Exit Date: 06/19/2026

- ☐ With regular document
☒ With alternate document (describe below)
☒ Transition Certificate

E. TRANSFER OF RIGHTS

Will the student be age of majority, married, or legally emancipated while the current IEP is in effect?

☐ Yes ☒ No

The student and parent have been informed of rights under Part B of IDEA that will transfer to the student at the age of majority?

- ☐ Yes Date informed:
☒ Not-applicable

The district must also provide written notice of the transfer of rights to the student and the parent when the student reaches the age of majority.

Date anticipated: 02/20/2026

The district has provided written notice of the transfer of rights to the student and the parent?

- ☐ Yes Date provided:
☒ Student has not reached age of majority

Name Carner, Oliver	Date of Birth 02/20/2008	Student Number 289173	Document Date 06/06/2023
-------------------------------	------------------------------------	---------------------------------	------------------------------------

F. SUMMARY OF PRESENT LEVELS OF PERFORMANCE FOR TRANSITION PLANNING

Student preferences, needs, interests & strengths

Preferences: Oliver prefers to have a quiet environment with minimal distraction. He enjoys being on the move and doing hands on things
Interest: Oliver has interest in being active, sensory activities, and eating his favorite foods, communicating through ASL
Needs: Oliver needs to work with someone who communicates through ASL, needs a small environment, consistent staff members, no distractions
Strengths: Oliver has strength in communicating in ASL with familiar words, strength in following his routine

Results of age-appropriate transition assessments

Informal assessment is that he would do well in a job with a similar daily routine that involves physical labor
Formal assessment Oliver identified jobs in cooking, yard work, and janitorial duties

G. SUMMARY OF AGE-APPROPRIATE TRANSITION PLANNING

MEASURABLE POST-SECONDARY GOALS:

Training
After graduating high school, Oliver will participate in training around community navigation
Education:
After graduating high school, Oliver will continue education in ASL communication
Employment:
After graduating high school, Oliver will pursue a part time job in a job around janitorial duties
Independent Living Skill:
After graduating high school, Oliver will live with family

Transition services (including projected courses of study) to assist in meeting post-secondary goals:

School Year: 2022-2023
List Courses: 9th grade electives, 9th grade functional literature and composition, 9th grade functional math, 9th grade functional science, 9th grade functional social studies
Coordinated Activities
Instruction - 9th grade academics
School Year: 2023-2024
List Courses: Life Skills
Coordinated Activities
10th grade Behavior and Functional Skills

Agency Participation:

Student Needs	Activities/Strategies	Person/Agency Responsible	Timeframe	Date of Completion
Independent/Daily Living Skills	Help support behaviors and family in the home	Erin Feeney	Throughout the calendar year	06/05/2024

Information received if any agency above did not attend

Name Carner, Oliver	Date of Birth 02/20/2008	Student Number 289173	Document Date 06/06/2023
-------------------------------	------------------------------------	---------------------------------	------------------------------------

H. SPECIAL FACTORS FOR IEP DEVELOPMENT

Check all factors that apply	Explanation
<p>Does the student exhibit behavior that impedes his/her learning or the learning of others?</p> <p><input checked="" type="checkbox"/> Yes <input type="checkbox"/> No</p> <p>If yes, the IEP team must consider the use of strategies, positive behavioral interventions and supports to address the behavior(s)</p>	<p>Oliver exhibits dysregulated behaviors that result in self-injurious behaviors. He has a safety/support plan.</p>
<p>Does the student have limited English proficiency?</p> <p><input type="checkbox"/> Yes <input checked="" type="checkbox"/> No</p>	
<p>Is the student blind or visually impaired?</p> <p><input type="checkbox"/> Yes <input checked="" type="checkbox"/> No</p> <p>If yes, Braille needs must be addressed in the IEP, or evaluation of reading/writing needs has been completed and determined that Braille is not appropriate</p>	
<p>Does the student have communication needs?</p> <p><input checked="" type="checkbox"/> Yes <input type="checkbox"/> No</p> <p>If yes, needs must be addressed in the IEP</p>	<p>Oliver communicates by signing, gesturing, and using AT. He requires speech/language therapy to encourage expressive language. He needs access to sign language and a communication device. His communication needs are being addressed under related services in his IEP.</p>
<p>Is the student deaf or hard of hearing?</p> <p><input checked="" type="checkbox"/> Yes <input type="checkbox"/> No</p> <p>If yes, the IEP addresses the student's language and communication needs, opportunities for direct communication with peers and professional personnel in the child's language and communication mode, academic level, and full range of needs, including opportunities for direct instruction in the student's language and communication mode.</p>	<p>Oliver has a profound hearing loss in both ears and currently wears hearing aids. Oliver accesses sign language and assistive technology to aid in communication.</p>
<p>Does the student need assistive technology devices or services?</p> <p><input checked="" type="checkbox"/> Yes <input type="checkbox"/> No</p> <p>If yes, services or devices must be addressed in the IEP</p>	<p>Oliver requires assistive technology to access his education and make progress on his IEP goals. He requires a visual schedule, sensory equipment (touch), brush, access to a 10" mobile device with communication and academic applications.</p>

Name Carner, Oliver	Date of Birth 02/20/2008	Student Number 289173	Document Date 06/06/2023
-------------------------------	------------------------------------	---------------------------------	------------------------------------

I. REQUIRED TESTING AND ASSESSMENTS

Statewide Assessments

Will the student participate in any Statewide Assessment?

- ☒ Yes – assessment will be conducted while the current IEP is in effect.
☐ No – at the time of testing, assessment is not conducted at the student's grade level.

Assessment Participation				
Testing Grade	Assessment Area	Administration Method	Explanation* <i>Why the student cannot participate in regular assessment and why alternate assessment was chosen.</i>	Accommodation
10	State Science (5, 8, HS)	Standard with Accommodations	Oliver's autism and hearing impairments impact him such that he is not able to participate in the standard smarter balance assessments.	Quiet environment, frequent breaks, given by familiar person, and sign language interpreter.
10	State Social Studies (5, 8, HS)	Standard with Accommodations	Oliver's autism and hearing impairments impact him such that he is not able to participate in the standard smarter balance assessments.	Quiet environment, frequent breaks, given by familiar person, and sign language interpreter.

Districtwide Assessments

Will the student participate in any Districtwide Assessment?

- ☐ Yes – assessment will be conducted while the current IEP is in effect.
☒ No – at the time of testing, assessment is not conducted at the student's grade level.

Name Carner, Oliver	Date of Birth 02/20/2008	Student Number 289173	Document Date 06/06/2023
-------------------------------	------------------------------------	---------------------------------	------------------------------------

J. MEASURABLE ANNUAL GOALS

When will progress be reported to the parent?

Semesterly

How will progress be reported?

With schools progress reports

Anticipated Dates

Progress Period 1	06/16/2023
Progress Period 2	02/02/2024

Category: Behavioral Skills

Is the goal area related to alternate assessments aligned to alternative achievement standards? ☐ Yes (If Yes, short-term objectives are required)
☒ No

Goal:

In 36 instructional weeks, given frustration or physical pain, Oliver will chose an appropriate, safe coping strategy (bike, swing, beanbag, pillow) when given a visual or sign choice in 90% of observed opportunities as measured by daily data collection

Present Level:

Currently, Oliver is choosing a appropriate coping skill in 30% of opportunities

Is the goal area related to alternate assessments aligned to alternative achievement standards? ☐ Yes (If Yes, short-term objectives are required)
☒ No

Goal:

In 36 instructional weeks, Oliver will demonstrate the ability to have safe hands and body with no staff redirects in 50% of observed opportunities based on teacher observation and data.

Present Level:

Currently at 20%

Is the goal area related to alternate assessments aligned to alternative achievement standards? ☐ Yes (If Yes, short-term objectives are required)
☒ No

Goal:

In 36 instructional weeks, Oliver will demonstrate the ability to walk from one point in the school/room to another averaging a 1 (significant support, one person holding on to him, the second person walking beside him without touching him) using the 0 to 3 scale in 60% of observed opportunities. based on teacher observation and data.

0 = constant support/both staff holding on

1 = significant support/one staff holding onto him, the second staff walking beside him without touching him

2 = minimal support/one staff able to walk with student gently holding hand

3 = independent/staff walking in proximity without touching

Present Level:

Currently at 40%

Is the goal area related to alternate assessments aligned to alternative achievement standards? ☐ Yes (If Yes, short-term objectives are required)
☒ No

Goal:

In 36 instructional weeks, Oliver will demonstrate the ability to sit at his table and work on/complete a task with a safe hands and body for a minimum of 15 minutes averaging a 1 (significant support, with one staff seated beside him, while the other staff is moved away not seated directly beside him, but available for support/assistance for safety) using the 0 to 3 scale in 30% of observed opportunities based on teacher observation and data.

0 = constant support/both staff holding on

1 = significant support/one staff holding onto him, the second staff walking beside him without touching him

2 = minimal support/one staff able to walk with student gently holding hand

3 = independent/staff walking in proximity without touching

Present Level:

Currently 0%

L. STATEMENT OF NONPARTICIPATION JUSTIFICATION

☒ The team has determined the student will need to be removed from participating with nondisabled students in order to receive specially designed instruction, related services, or supplementary aids or services.

Removal Area	Extent of Removal	Explanation and Justification
<input checked="" type="checkbox"/> From the regular classroom	Oliver will be removed from the general education classroom for specially designed instruction for 450 min/wk for Behavior	In order to make progress on his IEP goals, Oliver needs an environment that has limited stimuli. Oliver has a hard time focusing and needs constant redirection. He also needs high levels of reinforcement and a highly structured program to make progress.
<input type="checkbox"/> During extracurricular activities		
<input type="checkbox"/> During nonacademic activities
